> Ayaz lives in Erzurum. It is very cold there in winter. Today, Ayaz and his sister Buse have an "ice race" in the kitchen. First, they take three ice cubes. They put the first ice cube on a plate near the window, in the sun. They put the second ice cube in a cup and add some salt. They put the third ice cube in a glass jar and put the cover on it. Then they wait. Ten minutes later, they look. The ice cube with salt melts first! The ice cube in the jar is still big. "Science is fun!" says Buse.

1. Where does Ayaz live?

2. Where do they put the first ice cube?

3. What do they add to the second ice cube?

4. Which ice cube melts first?

E Challenge 2 – My experiment

Write the steps of a simple experiment. *(Basit bir deneyin adımlarını First, Then, Next, Finally ile yaz.)*
