12. Research on social networks suggests that people can maintain only a limited number of meaningful relationships at the same time. Because time and emotional energy are limited, we tend to invest most of them in a small inner circle of close friends, while keeping looser ties with a much larger group of acquaintances. Interestingly, these weaker ties are far from useless. Studies of job seekers, for example, have shown that people often hear about new opportunities from acquaintances rather than from close friends, since acquaintances move in different social circles and therefore have access to different information.

According to the passage, people focus most of their time and energy on a small group of close friends because ----.
