d) Gençlerin internette günde beş saatten az vakit geçirmesi uyku sorunlarını azaltabilir.
e) Günde beş saat internette vakit geçiren gençlerin çoğu uyku sorunu yaşamaktadır.

11. 3D printing, a technology that builds objects layer by layer from a digital design, was developed in the 1980s but remained very expensive for decades. Today, printers that cost less than a laptop can be bought online, and their uses are growing rapidly. Doctors use them to produce models of patients’ organs, which help them plan difficult operations. In some countries, small houses have been printed in less than two days, using a special type of concrete. Despite these successes, the technology still has limitations. Printing large objects remains slow, and the quality of cheaper printers is often poor. Some experts also worry that people could use the technology to make dangerous items at home.

According to the passage, doctors use 3D printing to ----.

a) build hospitals more quickly
b) replace patients’ damaged organs
c) make models that help them prepare for operations
d) print medicines at home
e) train nurses online
