11. Greeting customs can cause confusion when people from different cultures meet. In Turkey, friends and relatives often kiss each other on both cheeks, and younger people may kiss the hand of an elderly relative and touch it to their forehead as a sign of respect. In Japan, on the other hand, bowing is the traditional greeting, and the depth of the bow depends on the social status of the person you are greeting. In many Western business settings, a firm handshake and direct eye contact are expected, while in some other cultures, looking directly into the eyes of an older person may be seen as disrespectful. Experts in intercultural communication advise travellers to observe how local people behave and to follow their example rather than relying on their own habits.

According to the passage, in Japan ----.
