A Reading: Hıdırellez

4 × 3 = 12 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısaca cevaplayın.)*

> Hıdırellez is a spring festival in Türkiye. People celebrate it on the night of 5 May and on 6 May. My family and I attended the celebrations in Edirne this year.
> In the evening, people gathered by the river. There was music everywhere, and many people danced. Some people wrote their wishes on small pieces of paper and tied them to rose trees. My little brother wished for a bike! Later, young people jumped over small fires, because they believe it brings good luck and health. In the morning, people went to the river and washed their faces. It was a colourful and joyful celebration.

D Reading: Earth Hour

4 × 3 = 12 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısaca cevaplayın.)*

Earth Hour is an event for our planet. It started in Sydney, Australia, in 2007. Now people in more than 180 countries join it. Every year, on a Saturday in March, people turn off their lights for one hour, from 8:30 to 9:30 in the evening. Famous places like the Eiffel Tower in Paris and the bridges in Istanbul also go dark.

The aim is not only to save energy for one hour. Earth Hour reminds people that climate change is a serious problem and that everyone should take action. Last year my family joined it. We turned off all the lights, lit candles and played board games. It was fun, and it made us think about our energy use.

1. Where and when did Earth Hour start?

F Reading: Our solar system

4 × 3 = 12 puan

Read the text and complete the sentences with ONE word or number from the text. *(Metni okuyun; cümleleri metindeki BİR kelime ya da sayıyla tamamlayın.)*

> Our solar system has eight planets. The four planets closest to the Sun — Mercury, Venus, Earth and Mars — are rocky planets. The other four — Jupiter, Saturn, Uranus and Neptune — are giant planets made mostly of gas and ice.
> Mercury is the smallest planet and Jupiter is the largest. Venus is the hottest planet, because its thick atmosphere traps the heat. Uranus is unusual: it turns on its side. Neptune is the windiest planet; its winds are faster than 2,000 kilometres per hour.

1. The four planets closest to the Sun are _____ planets.
2. _____ is the smallest planet in our solar system.
3. Venus is the hottest planet because its thick _____ traps the heat.
4. _____ is the windiest planet in the solar system.

G Reading: The story of Pluto

4 × 3 = 12 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısaca cevaplayın.)*

In 1930, a young American astronomer, Clyde Tombaugh, discovered Pluto. He was only twenty-four years old. He worked at an observatory in Arizona and compared hundreds of photos of the night sky. For 76 years, Pluto was the ninth planet of our solar system.
But in 2006, scientists decided that Pluto was too small to be a planet, so they called it a “dwarf planet”. In the same year, NASA launched a spacecraft called New Horizons. It travelled for nine years, and in July 2015 it flew past Pluto and sent the first clear photos. The photos showed a big heart-shaped area on Pluto’s surface.
