D Challenge 1: The girl who fixed radios

Challenge: Read the biography and answer the questions. *(Zenginleştirme: Biyografiyi okuyun ve soruları cevaplayın.)*

> Nermin Ateş was born in Gaziantep in 1958. Her father owned a small electronics shop, and she spent every afternoon there after school. When she was nine, her father’s old radio stopped working. Nermin opened it, looked at the wires carefully and fixed it in two hours. Her father was very surprised and very proud.
> Nermin studied hard and went to university in İstanbul to study electrical engineering. There were only three girls in her class. Some people laughed at her because they thought engineering was a job for men. Nermin didn’t listen to them. She graduated in 1981 with the highest marks in her year.
> In 1985, she moved to Ankara and joined a team that built parts for satellites. She worked there for twenty-five years and won two national awards. After she retired, she went back to Gaziantep and started a free club called “Little Engineers” for girls. Today more than two hundred girls build robots and radios in her club every year.

1. What did Nermin do when she was nine?

2. Why did some people laugh at her?

3. What did she do in 1985?

4. What is the name of the club she started, and who is it for?

E Challenge 2: My biography in 2090

Challenge: Write an imaginary biography. *(Zenginleştirme: Hayalî bir biyografi yazın.)*

1. Imagine it is the year 2090. Write your own biography, looking back on your life. Where were you born? What did you study? What did you achieve? (6–7 sentences)
