C Wildlife fact cards

Read the fact cards and answer the questions. *(Bilgi kartlarını okuyun ve soruları cevaplayın.)*

> WILDLIFE FACT CARDS – Science Corner, Class 7-E
> 1. The caracal: The caracal is a wild cat with long black ears. It lives in deserts, dry forests and mountains in Africa and Asia; there are caracals in southern Türkiye too. It usually hunts at night. Its prey is birds, rabbits and other small mammals. A caracal can jump about three metres into the air to catch a bird!
> 2. The Komodo dragon: The Komodo dragon is the biggest lizard in the world. This enormous reptile lives on a few islands in Indonesia, and it can be three metres long. It eats deer and wild pigs, and its bite is poisonous. Komodo dragons often lie in the sun in the morning because they need the heat.
> 3. The harpy eagle: The harpy eagle lives in the rainforests of South America. It is one of the strongest birds in the world. It builds its nest at the top of very tall trees and hunts monkeys and sloths. Harpy eagles are in danger because humans cut down their forests.

1. Where does the caracal live?

.....

.....

2. When does the caracal usually hunt?

.....

3. Why do Komodo dragons lie in the sun in the morning?

.....

4. What does the harpy eagle hunt?

.....

5. Why are harpy eagles in danger?

.....
