5. take action	e) atığı azaltmak
6. save energy	f) harekete geçmek

C From bottle to T-shirt

Read the text and answer the questions. *(Metni okuyun ve soruları cevaplayın.)*

FROM BOTTLE TO T-SHIRT

Did you know that your new T-shirt can come from old plastic bottles? Here is how recycling works.

First, people put their empty bottles in the yellow recycling bins. Then, trucks collect the bottles and take them to a recycling factory. At the factory, workers separate the bottles by colour, and machines wash them carefully. Next, the machines cut the clean bottles into very small pieces called flakes. After that, other machines melt the flakes and turn them into long, thin threads. Finally, factories use these threads to make T-shirts, bags and even school bags.

About twenty-five bottles can make one warm jacket. Recycling saves energy and natural resources, and it reduces the waste in our seas. So remember: an empty bottle is not rubbish. It is the start of something new!

1. Where do people put their empty bottles?

.....

2. What do the workers do at the factory?

.....

3. What are “flakes”?

.....

4. Why is recycling important? Write two reasons.

.....

.....

D Planting a tree

Put the words in the correct order. *(Kelimeleri doğru sıraya koyarak cümle kurun.)*

1. *a / small / the / hole / dig / in / ground. / First,*

.....

2. *tree / Then, / in / young / put / the / hole. / the*

.....

3. *forget / Don’t / every / day. / it / to / water*

.....

4. *tree / grow. / wait / for / Finally, / to / the*

.....

E Describe a process

Write your answers. *(Cevaplarınızı yazın. Örnek cevaplar cevap anahtarındadır.)*

1. Describe a simple process that helps the environment (how to save water at home, how to sort waste, how to plant seeds…). Use First, Then, Next, After that and Finally. (5–6 sentences)
