7. Sınıf İngilizce Environment Destekleme ve Zenginleştirme Kâğıdı

WORKSHEET

2026-2027 · Ünite 9: Environment · Destekleme (Support) ve zenginleştirme (Challenge)

Name: _____ Class: _____ Date: _____

A Support 1: Environment words

Support: Match the words with their Turkish meanings. *(Destekleme: Kelimeleri Türkçe anlamlarıyla eşleştirin.)*

1. pollution	a) yenilenebilir
2. renewable	b) sıcaklık
3. waste	c) atık; israf etmek
4. temperature	d) kirlilik
5. threaten	e) tehdit etmek

B Support 2: must or mustn’t?

Support: Complete with must or mustn’t. *(Destekleme: Kutudaki must veya mustn’t ile tamamlayın.)*

must • mustn’t • can’t go

1. You _____ throw litter on the beach.
2. We _____ recycle paper and glass.
3. People _____ cut down too many trees.
4. We _____ protect wild animals.

C Support 3: Step by step

Put the words in the correct order. *(Kelimeleri doğru sıraya koyarak cümle kurun.)*

1. *newspapers. / the / collect / First, / old*

2. *Then, / put / the / bin. / blue / them / in*

3. *save / have / water. / to / We*

D Challenge 1: A zero waste school

Challenge: Read the text and answer the questions. *(Zenginleştirme: Metni okuyun ve soruları cevaplayın.)*

> Two years ago, Atatürk Secondary School in Denizli had a big problem: every day, the cleaners filled about forty bags of rubbish. Most of it was plastic cups, paper and food waste. The students decided to take action and joined the “Zero Waste” project.
> The first step was difficult. For one week, every class had to count and sort all its rubbish. The results surprised everyone: most of the waste was not really rubbish! Paper, plastic and glass could be recycled, and food waste could become compost.
> Then, the school made new rules. Students have to use their own water bottles; plastic cups are not allowed in the canteen any more. Every classroom has three bins for paper, plastic and other waste, and two students check them every Friday. Next, the eco club built three big compost boxes behind the school, and now the canteen’s food waste becomes compost for the school garden.
> The results are amazing. Today the school produces only about five bags of rubbish a day. Last year, the city gave the school an award. “We didn’t have to spend money,” says the headmaster. “We only had to change our habits.”

1. How much rubbish did the school produce every day two years ago?

2. What did the students have to do in the first week?

3. How does the school use the food waste now?

4. Why did the school win an award?

E Challenge 2: An instruction leaflet

Challenge: Write instructions. *(Zenginleştirme: Adım adım talimat yazın.)*

1. Write instructions for an eco-friendly project: how to make a bird feeder from a plastic bottle. Write at least six steps. Use First, Then, Next, After that, Finally, and don’t forget a safety tip.
