A Reading: A weekend in Trabzon

4 × 4 = 16 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısa cevaplarla yanıtlayın.)*

> Ahmet’s family went to Trabzon for a long weekend in April. On the first day, they visited Sümela Monastery. It is built on a steep cliff, and the view of the forest below was breathtaking. On the second day, they drove to Uzungöl, a lake surrounded by green mountains. They stayed in a wooden hotel by the lake and had a traditional breakfast with corn bread and butter. Ahmet’s mother usually prefers seaside holidays, but even she agreed that Uzungöl was incredible. On the last day, it rained all day, so they visited the Atatürk Pavilion and bought hazelnuts and tea as souvenirs.

1. Where is Sümela Monastery built?

.....

.....

2. Where did they stay in Uzungöl?

.....

.....

3. What kind of holidays does Ahmet’s mother usually prefer?

.....

.....

4. What did they buy as souvenirs?

.....

.....

B Reading: Bones in the field

4 × 4 = 16 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısa cevaplarla yanıtlayın.)*

> Two years ago, a farmer in a village near Kırşehir found some strange bones in his field. He called the university, and a team of researchers came to the area. They discovered the fossils of an ancient elephant-like animal, about eight million years old. They carefully cleaned the bones and took them to the lab.
> Today, the team is still working on the fossils. Dr Kaan Erbil and his students are measuring the bones and comparing them with other fossils from Europe and Asia. At the moment, they are also preparing an exhibition for the local museum. 'Children are already asking when they can see the bones,' says Dr Erbil. 'We are trying to finish everything by September.'

1. Who found the strange bones?

2. How old are the fossils?

3. What are Dr Erbil and his students doing now?

4. When do they want to finish everything?

C Reading: A lucky accident

4 × 4 = 16 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısa cevaplarla yanıtlayın.)*

Sometimes great discoveries happen by accident. In 1928, the Scottish scientist Alexander Fleming was studying bacteria in his lab in London. Before he went on holiday, he left some dishes of bacteria on his table. When he came back, he noticed something strange: a kind of mould was growing on one dish, and around the mould, the bacteria were dead.
Fleming did more experiments and found out that the mould produced a substance that killed bacteria. He called it penicillin. Years later, other scientists developed it into a medicine.
Penicillin became the first antibiotic, and it has cured millions of people of dangerous infections.

1. What is the main idea of the text?

.....

.....

2. Where was Fleming working in 1928?

.....

.....

3. What did Fleming notice when he came back from holiday?

.....

.....

4. What did penicillin become?

.....

.....

D Writing: A great invention

1 × 20 = 20 puan

Write a short paragraph (50–70 words). *(Kısa bir paragraf yazın (50–70 kelime).)*

1. Write about a scientific achievement (an invention or a discovery). Who invented or discovered it? When? Why is it important? How do we use it today?

E Reading: Be ready for an earthquake

4 × 4 = 16 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısa cevaplarla yanıtlayın.)*

> BE READY FOR AN EARTHQUAKE!
> Türkiye is on active fault lines, so earthquakes can happen at any time. Here’s how to be ready.
> Before: Fix heavy furniture to the walls. Prepare an emergency kit with water, food, a torch, a whistle and a first aid kit. Decide on a meeting point with your family.
> During: Drop, cover and hold on! Get under a strong table and protect your head. Stay away from windows.
> After: Leave the building carefully. Use the stairs, not the lift. Don’t use your phone unless it is an emergency, because the lines will be busy.
> Remember: Preparation saves lives!

1. Why can earthquakes happen at any time in Türkiye?

2. Write three things you should put in an emergency kit.

3. What should you do during an earthquake?

4. Why shouldn’t you use your phone after an earthquake?

F Reading: Water in the future

4 × 4 = 16 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısa cevaplarla yanıtlayın.)*

> Scientists at a conference in Konya made some predictions about water in the future. They believe that summers in Central Anatolia will be hotter and drier. Some lakes, like Lake Tuz, are already getting smaller, and this will continue if we don’t act. Farmers use about 70 percent of the water in the region, so the experts said farmers should use drip irrigation instead of flooding their fields.
>
> They also said there will be water shortages in big cities by 2050 if people keep wasting water. ‘Every drop counts,’ said one of the speakers. ‘Schools should teach children to save water from an early age.’

1. Where was the conference?

2. What will summers in Central Anatolia be like?

3. How much of the water in the region do farmers use?

4. What will happen in big cities by 2050 if people keep wasting water?
