A Reading: Snowboard camp

4 × 3 = 12 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısa cevaplarla yanıtlayın.)*

> During the semester holiday, Doruk joined a five-day snowboard camp on Mount Erciyes in Kayseri. He had never tried snowboarding before, so the first day was really hard. He fell down more than twenty times! His instructor, Aslı, told him to bend his knees and look forward, not down. On the third day, Doruk finally went down a small slope without falling. On the last day, the group went on a longer run, and Doruk felt like a professional. ‘Skiing looks easier,’ he says, ‘but snowboarding is more fun and more challenging. I’d rather snowboard than ski any day!’

1. How long was the camp?

.....

.....

2. What advice did Aslı give Doruk?

.....

.....

3. What happened on the third day?

.....

.....

4. Why does Doruk prefer snowboarding to skiing?

.....

.....

B Reading: Dormitory rules

4 × 3 = 12 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısa cevaplarla yanıtlayın.)*

> Welcome to Atakent Boarding School! Here are the dormitory rules.
> • You must make your bed before breakfast.
> • You are responsible for keeping your wardrobe tidy.
> • Each room has a cleaning day. On your room’s day, you have to sweep the floor and empty the bins.
> • Do the laundry on Wednesdays and Saturdays only.
> • Keep quiet after 10 p.m.
> • You mustn’t eat in the bedrooms.
> • Return books to the study room on time.
> If you break the rules three times, you will lose your weekend free time.

1. When must students make their beds?

.....

.....

2. What do students have to do on their room’s cleaning day?

.....

.....

3. On which days can students do the laundry?

.....

.....

4. What happens if a student breaks the rules three times?

.....

.....

C Reading: Space tomatoes

4 × 3 = 12 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısa cevaplarla yanıtlayın.)*

Right now, a group of students from Kayseri are waiting for important results. Last autumn, they sent tomato seeds to a space station as part of an international school project. The seeds stayed in space for six months, and then they came back to Earth. Now the students are growing the space seeds and normal seeds side by side in their school lab. Every day, they are measuring the plants and writing the results in a notebook. So far, the space tomatoes are growing a little more slowly. ‘We don’t know why yet,’ says Gizem, one of the students. ‘That’s what makes science exciting!’

1. What did the students send to a space station?

.....

.....

2. How long did the seeds stay in space?

.....

.....

3. What are the students doing every day?

.....

.....

4. What have they noticed so far?

.....

.....

D Reading: The father of robotics

4 × 3 = 12 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısa cevaplarla yanıtlayın.)*

Long before modern robots, an engineer from Cizre was designing amazing machines. His name was Ismail al-Jazari, and he lived in the 12th and 13th centuries. He worked in the palace of the Artuqid rulers in Diyarbakır. In 1206, he finished a famous book that described about fifty machines, with detailed drawings.

One of his best-known inventions is the ‘Elephant Clock’. It used water to measure time, and small figures moved and made sounds every half hour. He also designed water pumps and automatic hand-washing machines. Many people call al-Jazari ‘the father of robotics’, because his ideas inspired engineers for centuries.

1. What is the main idea of the text?

2. When did al-Jazari finish his famous book?

3. How did the Elephant Clock measure time?

4. Why do many people call him ‘the father of robotics’?

E Writing: An invention that changed our lives

1 × 20 = 20 puan

Write a short paragraph (50–70 words). *(Kısa bir paragraf yazın (50–70 kelime).)*

1. Choose an invention that changed our lives (for example the telephone, the computer or the light bulb). Write who invented it, when, how life was before it and how we use it today.

F Reading: Forest watch

4 × 3 = 12 puan

Read the text and answer the questions. *(Metni okuyun ve soruları kısa cevaplarla yanıtlayın.)*

Every summer, wildfires damage thousands of hectares of forest in the Mediterranean region. Hot weather, strong winds and dry plants make it easy for fires to start and spread. Experts say most wildfires are caused by people, for example by barbecues, cigarettes or broken glass left in forests.

Last August, volunteers in a village near Muğla formed a ‘forest watch’ team. They take turns to watch the hills from a tower day and night. When they see smoke, they call 112 immediately. Thanks to them, firefighters stopped two small fires before they became disasters. Scientists predict that summers will be hotter, so teams like this will be even more important.

1. What makes it easy for fires to start and spread?

2. What causes most wildfires?

3. What do the volunteers do when they see smoke?

4. Why will these teams be more important in the future?

G Writing: Earthquakes

1 × 20 = 20 puan

Write a short paragraph (50–70 words). *(Kısa bir paragraf yazın (50–70 kelime).)*

1. Write about earthquakes in Türkiye. Explain their reasons and results, make a prediction and give suggestions.
