   d) will

5. I think there will be ____ forests in 2100 because people are cutting down trees.

   a) fewer
   b) more
   c) less
   d) much

D Water in 2050

Read the text. Are the sentences true or false? *(Metni okuyun. Cümleler doğru mu, yanlış mı?)*

> WILL WE HAVE ENOUGH WATER IN 2050?
> A report by the school Environment Club
> Türkiye is not a water-rich country. Today, every person in Türkiye has about 1,300 cubic metres of water a year. Experts predict that this will fall to about 1,100 cubic metres by 2050 because the population is growing and the climate is changing. Summers will be longer and hotter, and there will be less rain in many regions. Lakes like Tuz Gölü are already getting smaller, and some farmers in Central Anatolia are suffering from drought.
> But it isn’t too late. Our club believes things will get better if everyone changes small habits. We asked 200 students at our school, and 150 of them said they leave the tap on while they brush their teeth. That is a lot of wasted water! So we started a campaign called “Every Drop Counts”. We think the school will save thousands of litres this year.

1. Experts predict that each person will have less water in 2050. ( )
2. There will probably be more rain in many regions. ( )
3. Tuz Gölü is getting smaller. ( )

4. Most of the students said they turn off the tap while brushing their teeth. ( )

5. The Environment Club started a campaign. ( )

E Make sentences

Put the words in the correct order. *(Kelimeleri doğru sıraya koyarak cümle kurun.)*

1. *droughts. / be / there / will / think / serious / I*

2. *get / will / future. / in / the / warmer / The / world*

3. *sea / Do / think / rise? / will / you / levels*

F Your predictions

Answer the questions. Give reasons. *(Soruları cevaplayın. Sebep belirtin.)*

1. Write two predictions about the weather in your city in 2050.

2. Do you think there will be more natural disasters in the future? Why / Why not?
