17. A few years ago, a farmer ploughing his field near a quiet village noticed some unusual stones. He informed the local museum, and a team of archaeologists soon began to dig. Over the next five years, they uncovered the remains of a 3,000-year-old town, including houses, a market square and a small temple. The most surprising discovery was a collection of children's toys made of clay: tiny animals, carts with wheels and balls. According to the head of the team, these toys show that children in ancient times used to play in very similar ways to children today. The site has now been opened to visitors, and the toys are displayed in the village museum.

How was the ancient town discovered?

a) A farmer noticed strange stones in his field.

b) A team of tourists found it.

c) Children found toys in the village.

d) The museum bought the land.

e) A storm uncovered the temple.
