b) I asked you for a favour, but you didn’t help me.

c) I owe you a favour for being so helpful to me.

d) I will help you if you do me a favour.

e) Thank you for asking me for a favour.

17. Smart home technology is often advertised as a way to make life more comfortable, but it can also help families save energy. Smart thermostats, for instance, learn when people are usually at home and adjust the heating automatically, so that empty houses are not heated unnecessarily. Smart plugs can switch off devices that are left on standby, which can account for up to ten per cent of a household’s electricity use. Some systems even show users how much energy each device is consuming in real time. Studies suggest that families who can see their consumption on a screen tend to change their habits and use less. However, experts note that these devices only help if people actually use them correctly; many smart features are never switched on after installation.

According to the passage, smart thermostats save energy by ----.

a) turning off all devices at night

b) adjusting the heating based on when people are home

c) producing electricity from sunlight

d) showing advertisements

e) heating empty houses

18. Devices left on standby ----.

a) use no electricity at all
b) are switched off by smart thermostats
c) are the main cause of high heating bills
d) can be responsible for up to ten per cent of a home’s electricity use
e) cannot be controlled by any technology

19. What do studies suggest about families who can see their energy use on a screen?

a) They often change their habits and consume less.
b) They buy more devices.
c) They stop using smart technology.
d) They ignore the information.
e) They spend more on heating.

20. The experts mentioned in the passage warn that ----.

a) smart home devices are dangerous
b) smart devices are too expensive for most families
c) standby power is not a real problem
d) smart thermostats break easily
e) the benefits depend on people using the devices properly
