b) from
c) than
d) as

6. A: What do you think about space tourism? / B: ___

a) Yes, I think.
b) I went to space.
c) It’s far away.
d) In my opinion, it is too expensive for most people.

7. Neither my brother ___ my sister has visited another country.

a) or
b) nor
c) and
d) but

8. The more we recycle, ___ waste we send to landfills.

a) the less
b) less
c) the fewer than
d) little

9. Water covers more than seventy per cent of our planet, so it is easy to think that we will never run out of it. However, only a small part of the Earth’s water is fresh water that people can actually use, and much of it is frozen in glaciers. As cities grow and summers become hotter, many regions are facing serious water shortages. Agriculture uses the largest share of fresh water, so farmers play a key role in the solution. In some countries, farmers have switched from flooding their fields to drip irrigation, which delivers water directly to the roots of plants and can reduce water use significantly. Cities can help too: repairing old pipes prevents huge amounts of water from being lost underground. And individuals are not powerless. Taking shorter showers, fixing dripping taps and collecting rainwater for gardens all make a difference. Experts warn that if we do not change our habits, water could become one of the main causes of conflict in the coming decades.

According to the text, why may people wrongly think that water will never run out?

a) Because it rains every day
b) Because water covers most of the planet
c) Because glaciers are melting
d) Because cities use little water

10. Which sector uses the largest share of fresh water?

a) industry
b) households
c) agriculture
d) tourism

11. What is the advantage of drip irrigation?

a) It floods fields quickly.
b) It repairs old pipes.
c) It produces rainwater.
d) It reduces the amount of water used.

12. The word “powerless” in the text is closest in meaning to ___.

a) unable to do anything
b) very strong
c) responsible
d) careless

13. What do experts warn about?

a) Glaciers will disappear next year.
b) Water shortages may cause conflicts.
c) Farmers will stop working.
d) Cities will stop growing.

Fill in the blanks. *(Boşlukları doldurun.)*
