B Reading

3 × 10 = 30 puan

Read the text and answer the questions. *(Metni okuyun ve soruları cevaplayın.)*

> Tsunamis are giant sea waves. They are usually caused by earthquakes under the ocean. When a tsunami reaches the coast, the water can travel far onto the land and destroy buildings and roads. Before a tsunami, the sea sometimes moves back from the beach very quickly. If you see this, you should run to high ground immediately. Many countries now have warning systems that send messages to people’s phones.

1. What usually causes tsunamis?

   a) Heavy rain
   b) Strong winds
   c) Earthquakes under the ocean
   d) Forest fires

2. What should you do if the sea moves back from the beach very quickly?

   a) Go to the beach to look
   b) Move to high ground
   c) Call your friends
   d) Swim in the sea

3. Which question is answered in the text?

   a) How do warning systems inform people?
   b) When did the last tsunami happen?
   c) How tall can tsunami waves be?
   d) Which country has the most tsunamis?
