B Reading

6 × 3 = 18 puan

Read the text and write True (T) or False (F). *(Metni okuyun; ifadeleri doğru (T) ya da yanlış (F) olarak işaretleyin.)*

> A tsunami is a series of huge waves in the ocean. Most tsunamis are caused by earthquakes under the sea, but volcanic eruptions and landslides can also cause them. In deep water, tsunami waves can travel as fast as a plane, but they are not very high. When they reach the coast, they slow down and become much taller.
> One warning sign is very important: if the sea suddenly moves back from the beach, people should go to higher ground immediately. Today, scientists use special devices in the ocean to detect tsunamis early. Thanks to these warning systems, many lives are saved.

1. All tsunamis are caused by volcanoes. ( )
2. Tsunami waves move very fast in deep water. ( )
3. The waves become taller near the coast. ( )
4. If the sea moves back, people should go to the beach to watch it. ( )
5. Scientists can’t detect tsunamis before they arrive. ( )
6. Warning systems help to save lives. ( )
