6. Sınıf İngilizce Okuma Metni: Life on the Space Station

WORKSHEET

Ünite/Tema: Life in the Universe & Future · Seviye A2 · 119 kelime · dersimizingilizce.com

Name: _____ Class: _____ Date: _____

A Read the text: True or False?

Read the text. Then write T (true) or F (false). *(Metni okuyun. Cümleler doğruysa T, yanlışsa F yazın.)*

> The International Space Station, or ISS, is a big laboratory in space. It goes around the Earth about every ninety minutes, so astronauts see about sixteen sunrises every day! Life on the ISS is very different. There is no up or down, and everything floats. Astronauts sleep in small sleeping bags on the wall. They eat special food from packets, and they drink through straws. Water drops can float away, so they are very careful. Astronauts also exercise for about two hours every day. Without exercise, their muscles and bones become weak in space. They do science experiments, fix machines and take photos of the Earth. In their free time, they read, watch films and talk to their families.

1. The ISS goes around the Earth about every ninety minutes. ( )
2. Astronauts see one sunrise a day on the ISS. ( )
3. Astronauts sleep in sleeping bags. ( )
4. Astronauts don’t need to exercise in space. ( )
5. Astronauts take photos of the Earth. ( )
