> Aziz Sancar is a Turkish scientist. He was born in 1946 in Savur, a small town in Mardin. His family was big and they didn't have much money, but his parents believed education was very important. Aziz was a hard-working student. He studied medicine at Istanbul University and then worked as a doctor in his hometown for a short time. Later, he went to the United States and studied biochemistry. He was very curious about DNA. Our DNA gets damaged every day, for example by sunlight. Aziz Sancar studied how our cells repair this damage. In 2015, he won the Nobel Prize in Chemistry with two other scientists. He still works at a university in the USA and helps young scientists.
