10. Sınıf İngilizce Okuma Metni: Why Bees Matter

WORKSHEET

Ünite/Tema: Life in Nature & Global Problems · Seviye B1 · 178 kelime · dersimizingilizce.com

Name: _____ Class: _____ Date: _____

A Read the text: True or False?

Read the text. Then write T (true) or F (false). *(Metni okuyun. Cümleler doğruysa T, yanlışsa F yazın.)*

When we think of bees, we usually think of honey. However, honey is not the most important thing bees give us. As they fly from flower to flower, bees carry pollen, which helps plants produce fruit and seeds. This process is called pollination. Without pollinators like bees, we would have far fewer apples, cherries, almonds, melons and many other foods. In recent decades, scientists in many parts of the world have reported that bee populations are falling. There are several reasons for this. Farmers use chemicals called pesticides to kill insects that damage crops, but some of these chemicals also harm bees. Wild flowers are disappearing as cities and farms grow bigger. Climate change is another problem, because flowers may bloom at the wrong time for the bees. Diseases and parasites also kill many colonies. The good news is that everyone can help. You can plant bee-friendly flowers, such as lavender and thyme, on your balcony or in your garden. Cities can leave some areas of grass uncut. Buying honey from local beekeepers also supports healthy bee colonies.

1. According to the text, honey is the most important thing bees give us. ( )
2. Pollination helps plants produce fruit and seeds. ( )
3. Some pesticides can harm bees. ( )
4. Climate change has no effect on bees. ( )
5. Lavender and thyme are bee-friendly plants. ( )

B Reading comprehension

Choose the correct answer according to the text. *(Metne göre doğru seçeneği işaretleyin.)*
