10. Sınıf İngilizce Okuma Metni: Cities of the Future

WORKSHEET

Ünite/Tema: Life in the Universe & the Future · Seviye B1 · 179 kelime · dersimizingilizce.com

Name: _____ Class: _____ Date: _____

A Read the text: True or False?

Read the text. Then write T (true) or F (false). *(Metni okuyun. Cümleler doğruysa T, yanlışsa F yazın.)*

> By 2050, around two-thirds of the world's population is expected to live in cities. That means our cities will need to change. So what might a city of the future look like? First, transport will probably be cleaner and smarter. Electric buses and trams may run on time thanks to sensors that track traffic in real time. Many people might not own a car at all; instead, they could share electric cars and bicycles through an app. Second, buildings will produce some of their own energy. Solar panels on roofs and walls, together with better insulation, could reduce electricity bills. Third, there will be more nature inside cities. Rooftop gardens, green walls and small parks can cool streets in summer and give birds and insects a home. Some cities are even testing vertical farms, where vegetables grow in tall buildings without soil. However, smart cities also bring challenges. Technology is expensive, and not everyone has the skills to use it. A truly smart city should be designed for all its citizens, including elderly people and those with lower incomes.

1. By 2050, most people in the world are expected to live in cities. ( )
2. Sensors may help buses and trams run on time. ( )
3. Everyone in future cities will own two cars. ( )
4. Vertical farms grow vegetables without soil. ( )
5. The text says smart cities have no challenges. ( )

B Reading comprehension

Choose the correct answer according to the text. *(Metne göre doğru seçeneği işaretleyin.)*

1. How might people travel in future cities?
