D Smart homes: convenient but safe?

Read the text. Are the sentences true or false? *(Metni okuyun. Cümleler doğru mu, yanlış mı?)*

> Smart home devices such as voice assistants, robot vacuums and connected cameras make daily life easier. You can turn on the heating on your way home or check who is at the door while you are at school. However, experts warn that these devices collect a large amount of personal data, including your voice, your habits and even the times when you are not at home. If a device is not properly protected, hackers could access this information. To stay safe, users should change default passwords, update their devices regularly and read the privacy settings carefully. Technology can make homes smarter, but users also need to be smart.

1. Smart home devices can be controlled from outside the home. ( )
2. They collect very little personal data. ( )
